THE

SOVEREIGN

COLLECTION

First impressions count. Your front door is the first feature people notice about your home; that is why it is so important. Your door makes a statement; it reflects your home's personality, your lifestyle and your aspirations.

This is why we introduced a high-quality, flush-fitting composite door that meets the exacting demands of today's discerning homeowner.

Designed with you in mind, our Sovereign Collection is one of the most comprehensive ranges of composite doors on the market.

BENEFITS OF A FLUSH COMPOSITE DOOR

Durable and attractive, composite doors are made to last. They are the future for entrance doors.

All Sovereign Collection composite doors are manufactured to the highest standards at our dedicated production facilities using top quality materials.

Our composite doors are produced using robust through-colour GRP door skins. Completely weatherproof, they have excellent resistance to knocks, scratches and whatever the weather throws at them.

Unlike other doors, they don't twist, warp or split. All door designs meet the latest energy efficiency regulations, achieving a U-value of 1.4W/m²K or below. Their thermally-efficient foam cores help to reduce energy bills and keep out noise.

Composite doors are low maintenance with no need to paint or varnish; an occasional wipe over with a damp cloth will keep your smart new front door looking as good as new.

High security comes as standard, meeting all the requirements demanded from a 21st century entrance door to keep you and your home safe.

Low Maintenance

No need to paint or varnish; simply wipe clean.

Secured by Design

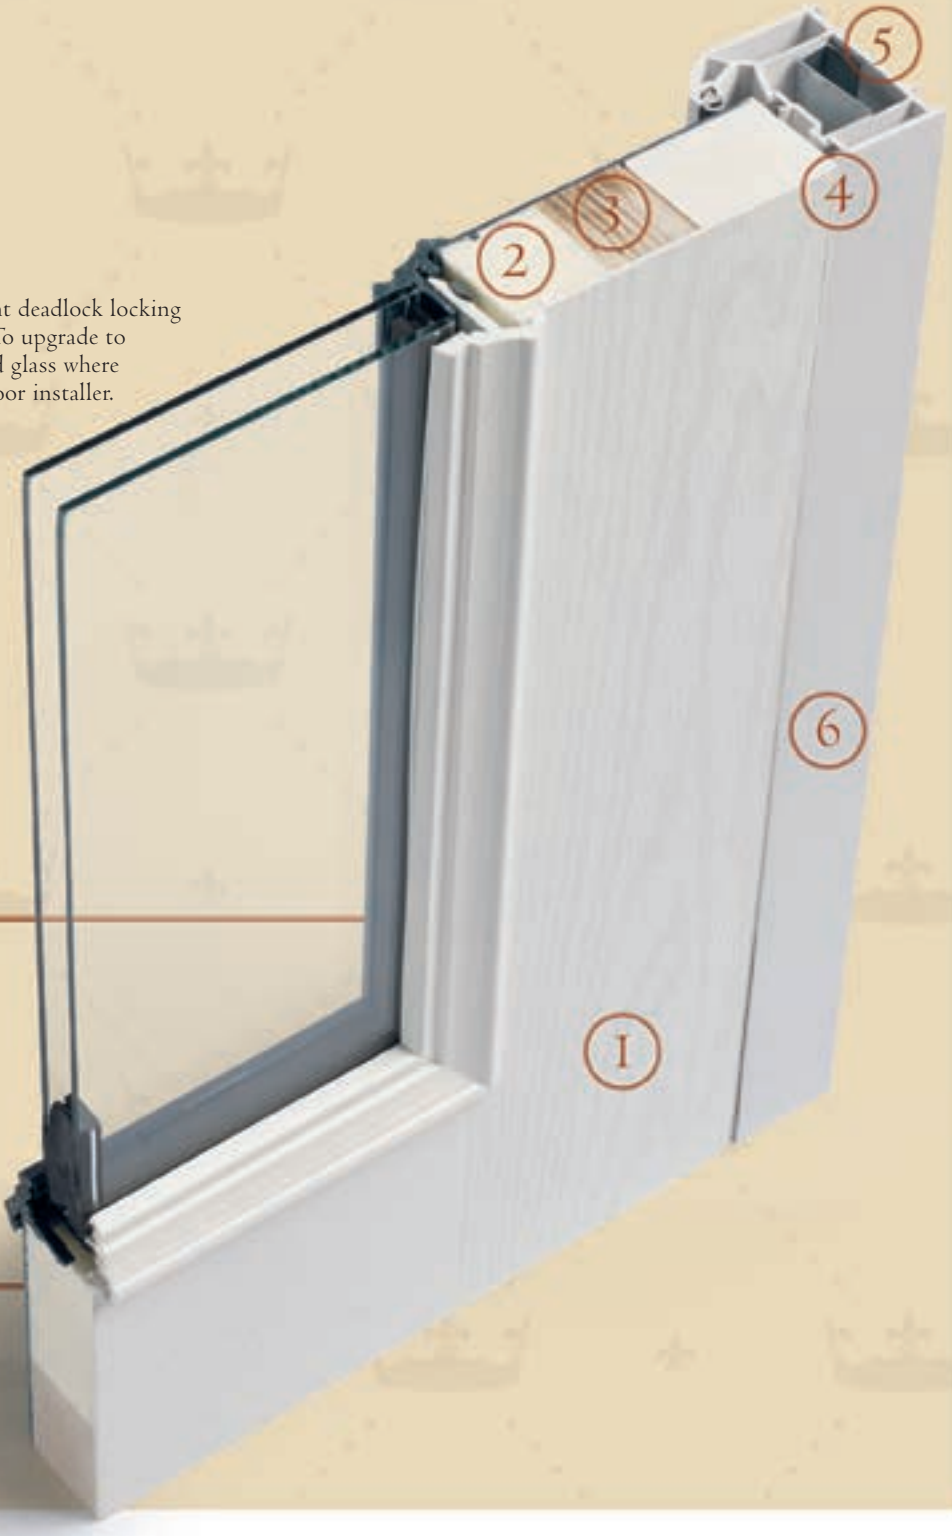
All Sovereign doors are supplied with multi-point deadlock locking systems, which conform to Secured by Design. To upgrade to Secure by Design status, doors require laminated glass where applicable. Speak to your approved Sovereign Door installer.

Robust

Composite doors are durable, with no twisting, warping or splitting as with timber doors.

Thermally Efficient

- All Sovereign Doors are 'B' Energy Rated (1.4 U-value) as standard.
- Upgrade to triple glazing and achieve an 'A' Energy Rating (1.2 U-value).
- All solid doors achieve an 'A++' Energy Rating (1.0 U-value).



1. Strong through-colour GRP facing
2. High insulation foam core
3. Stable timber inner frame
4. Wool pile seals x 2
5. Aluminium reinforced
6. Dedicated 70mm reinforced PVC-U frame

SOVEREIGN DOOR STYLES

The Sovereign range of doors provides you with a comprehensive choice of 15 styles, in various glass and colour choices.

Choose from 14 standard attractive colours, including beautiful woodgrain finishes that look like traditional wooden doors, but don't require the maintenance associated with timber. Or if you prefer, bespoke shades can also be supplied on request.

Today's composite doors are the perfect stylish, secure and low-maintenance choice; combining superb aesthetics with unrivalled, long-life performance. With superior weather-tightness, secure locking systems and greater thermal efficiency, your home is fully protected with a modern composite door.

How's that for peace of mind?

Whichever door you select, you can be assured that your door has been made to the highest quality standards. Whether your requirements are for a door with a large glass area to bring light in to your home, or a door with little or no glass to maintain the privacy in your home, you will find a design to suit in our extensive composite door range.

You and your home deserve the best. Install a Sovereign Collection door and you add long-term value, kerb appeal and security to your home – all at the turn of a key.

SAFE AND SECURE

Safety and security are uppermost in everyone's mind. 67% of burglars break in through the door, according to Home Office official crime statistics.

That's why our Sovereign Collection composite doors use only the best quality multi-point locking systems to keep your home and family fully protected.

Our doors are installed within a reinforced door frame and secured with a multi-point lock with two hooks, two finger bolts and a deadbolt. Premium adjustable hinges and keeps meet the latest standards and legislation.

Secured by Design

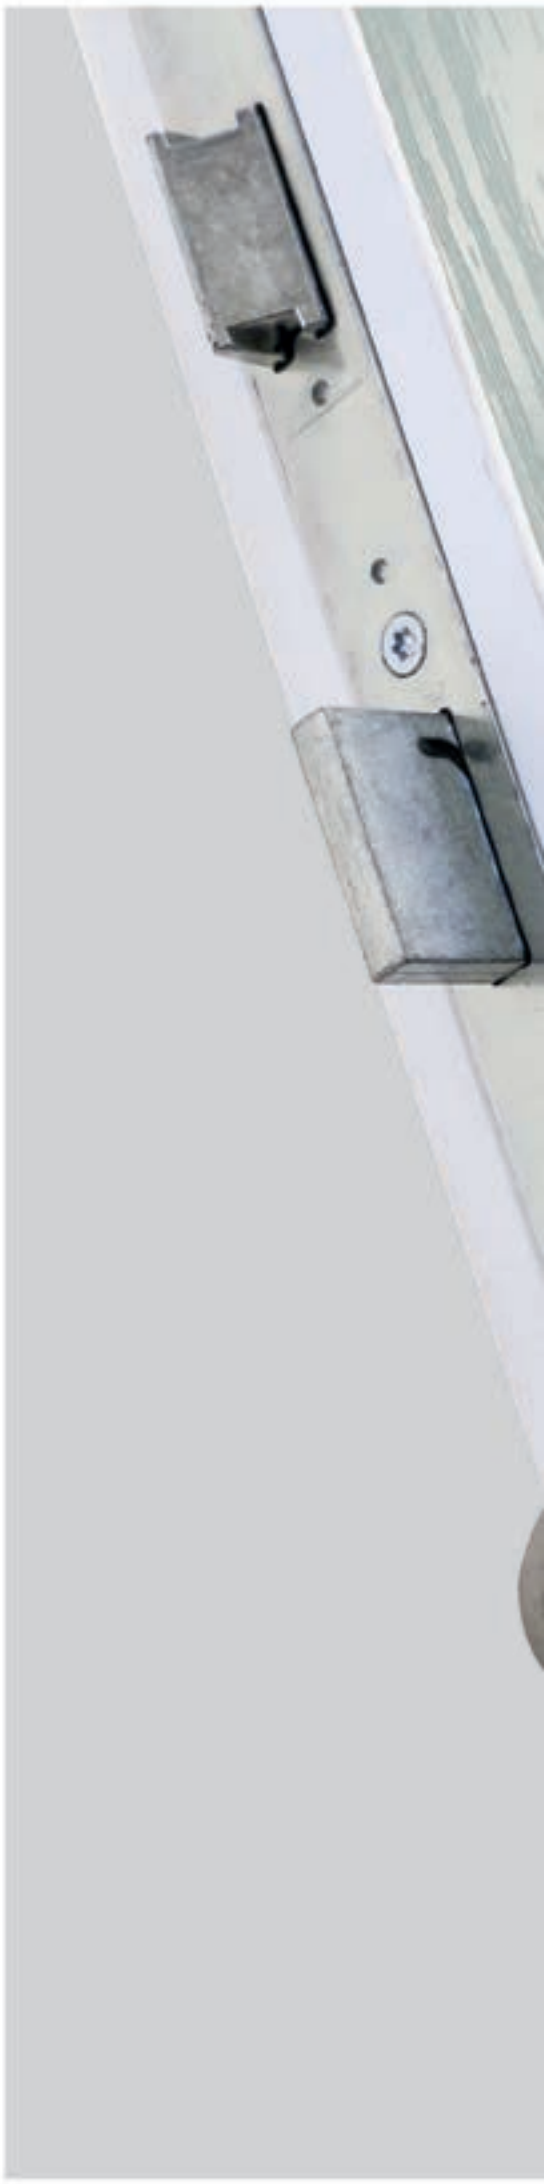
Feel reassured with a Sovereign Collection composite door, which is manufactured in accordance with Secured by Design, a Police-backed accreditation. Secured by Design is the official UK police approval for security products that ensures they are designed, manufactured and tested within strict rigid guidelines.

Sovereign Collection SBD-licensed doors are available as either solid or a limited glazed version, all glass must be laminated to achieve SBD status.

When a door is fitted with an external bar handle, the standard escutcheon (as shown below) is supplied.

Standard Escutcheon

Finger Pull Escutcheon



PERSONALISE YOUR DOOR

Your door is as individual as you are. We manufacture every composite door to the customer's exact and bespoke requirements.

Personalise your door from our vast range of options that add a unique finishing touch.

Starting with your door style from our comprehensive range – glazed or solid, it's up to you.

Next, you need to choose what type and style of glazing panel you require. Within our myriad of glass designs and styles, there are many choices to suit your location and lifestyle.

Then choose your colour, there are 14 standard finishes including the ability to have a bespoke finish to suit your exact needs.

Finally, select your hardware from our attractive ranges of standard or perfectly-matching door furniture in a range of quality finishes.

Range Options Fold Out User Guide

Turn to the product page of the door that you have chosen. Unfold the range option fold at the back of the brochure.

1st choose your glass and colour options from the double page spread.

Finally, fold inwards the hardware options tab.

THE

5 STEPS

TO YOUR PERFECT DOOR

Step 1

Decide on your door style. Twin glazed, single or solid, you can choose from our extensive ranges featured in the following pages.

Step 2

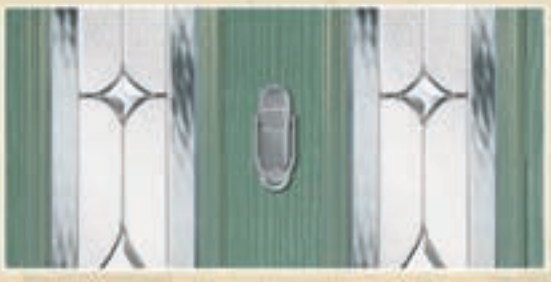
Select your glass. So many designs to select from, just refer to the pages relating to your door style for details.

Step 3

Choose a colour to suit your property or personal taste, there are great colours to choose from or you can request a bespoke colour.

Step 4

Choose a frame colour to suit your door. You can have it in white or matching the colour of your door.



Step 5

Finally no door is complete without the door furniture, we have a wide range of knockers, letterplates and handles to enhance your chosen door.

Your Finished Door

COLOUR OPTIONS

Whether you are looking to complement your home with a heritage colour or a bright solid colour, we have a range of finishes to bring out the best in your door.

Choose from our comprehensive range of colours to complement your glass designs and hardware colours. All doors can be supplied with the outer frame in white or matching the colour of your door - you decide what suits your home the best.

Bespoke Colour Selector

In addition to our colour range, you can have virtually any colour entrance door.* Simply provide your colour choice and RAL reference code and we do the rest.

* Not available in metallic colours.

GLAZING OPTIONS

Glass panels not only allow light into your home, they enhance and personalise your door according to your taste. A wide range of hand-crafted exclusive and stylish glazing designs are produced by our specialist team at our in-house glass facilities.

From traditional to contemporary styles, we can supply an eye-catching option that really creates a stunning focal point for your door. We can even supply totally bespoke designs to your own specification, from photographs or drawings for example.

From obscure patterns for privacy to stylish 'sandblasted' designs etched into the glass, you can be sure of finding the one to suit your individual needs and wishes. Intricate leaded styles complement traditional looking doors or you add a splash of creative colour from our popular Fusion range.

Our double and triple-glazed units are manufactured to BSEN 1279 standards. Both have excellent heat retention properties. Additionally, the elegant triple glazed units encapsulate the bevel design within the sealed unit for ease of cleaning.

Backing Glass Options

Our Composite door range offers the option of choosing your preferred backing glass. The backing glass sits on the inside face of the double glazed cassettes.

N.B. This option isn't available for the triple glazed designs.

GLOUCESTERSHIRE

This traditional 'cottage-style' door is a favourite with homeowners, suitable for either front or back doors.

The Gloucestershire's vertical 'boarded' appearance replicates the rustic 'tongue and groove' timber construction, which makes them ideal for restoration or replacement projects. Square or diamond-shaped glazed panels, with Fusion or bevelled glass options, can be added for additional light.

STABLE DOOR

Our Stable Door offers you the best of both worlds – a window and door in one.

Opening the top door only keeps children and pets safe and secure, while allowing fresh air into your home. High security locks and an effective weather-seal ensure it performs just as well as a standard single door. The lower half also accepts cat and dog flaps.

High security locks are used throughout. The split upper and lower door leafs can be locked to frame independently offering maximum security.

The stable door features high security locks that engage into the outer frame and an interlock between the top and bottom leaf.

Anthracite Grey/Monza

THE DOOR AND A HALF

Our 'Door and a Half' is literally just that – a composite door plus matching hinged side panel.

This can be opened up to allow wider access, for example when moving large items of furniture.

COMPOSITE DOOR - TECHNICAL DATA

1.0 Guidance

1.1 Care Of The Product

When using cleaning and lubricating products always follow the manufacturer's instructions; take care not to use an excessive quantity. For cleaning products, test a small area of the product in an obscure location first.

Note: Do not use solvent-based or abrasive cleaning products or products containing bleaching agents.

2.0 Surveying Points

2.1 Existing Load-bearing Doorsets

Check to ensure that there is a lintel or other suitable load-transferring structure above the door set. Plastics doorsets are not designed to carry dead loads.

2.2 Outward Opening Doorsets

Check the correct mode of opening (inward or outward).
On outward opening doorsets a restrictor, such as an overhead restrictor, may be required as the door leaf may be subject to sudden movement by wind gusting.

2.3 Cill & Threshold

The requirement for a cill of the appropriate size and the threshold type to be used shall be checked, with attention paid to the internal floor level and the need for the door to swing clear of internal floor-coverings.

3.0 Measurement

3.1 Flat Doors

3.1.1 Width Measurement

The width of the aperture shall be measured at three points - the top, middle, and bottom of the opening. The smallest of these is used to determine the aperture width.

3.1.2 Height Measurement

The height of the aperture shall be measured at three points - the left, middle, and right of the opening. The smallest of these is used to determine the aperture height.

3.1.3 Diagonal Measurement

The squareness of the aperture shall be checked by measuring the diagonals of the aperture. If the diagonals are more than 10mm different, then the client shall be informed, and a solution agreed.

3.1.4 Front to Back Dimension

Check that the installation of the new frame will not cause problems with the DPC or cavity closing.

3.2 Walls & Apertures

The aperture shall be checked to ensure that it is plumb and level.

3.3 Reveal Sizes

The difference between the internal and external reveal sizes shall be checked to ensure that the opening of the door or any door fitting will not be impeded by plaster, render or tiles etc.

4.0 Installation - Replacement

4.1 Pre-installation Checks

Prior to commencing any installation work, the sizes, type, and condition of all doorsets should be checked against both the survey sizes as well as the actual aperture sizes. The door set specification, including hardware, glazing and door style, should be checked against the order acknowledgement provided by the door set supplier. Before discarding any packaging for ancillary components which may be supplied loose, particularly lever handles. Check that all ancillary components required are accounted for.

Note: composite doorsets must be stored in a dry location prior to installation. Prolonged exposure to moisture may invalidate any applicable product guarantee.

4.2 Positioning Of Doorsets

The positioning of the new frame in the aperture is fundamental to the success of the installation. In general the replacement door set shall –

- Bridge the cavity
- Cover the DPC
- Be set back as far as possible in the aperture to minimise exposure to the elements.

4.3.1 Fixing distances

Generally, all four sides of the frame shall be secured using the following guidelines to determine the fixing spacings –

- Corner fixings should be a minimum of 150mm and a maximum of 250mm in from the external corner
- No mullion or transom fixings should be closer than 150mm, or further than 250mm from the centre line of a mullion or transom
- Intermediate fixings should be at centres no greater that 600mm
- There must be a minimum of 4 fixings on each jamb.

Note: If it is impossible to find a suitable fixing position, then the nearest possible fixing should be used.

4.3.2 Use of installation packers

Appropriately sized installation packers shall be used adjacent to fixing positions to prevent outer frame distortion during installation. Installation packers should be incompressible, resistant to rot or corrosion, and span the full width of the outer frame profile. For fire doorsets they should be of a hard, stable material. The fixings should be tightened so that the frame is held securely against the packers. Take care not to over-tighten the screws and distort the frame. Apply a small amount of silicone mastic to the shanks and heads of fixings that pass through the outer frame to ensure that no water penetrates into the frame.

Note: packers shall be used adjacent to hinge/locking points.

5.0 Perimeter Sealing

5.1 Drainage

When sealing perimeter joints take care to ensure any drainage channels are not blocked or obstructed.

* Please note: All heights exclude 30mm cill; Arched doors not available; Colour match between the outerframe in Rosewood and Light Oak and door slabs in Dark Wood and Light Wood is not exact due to differences in the material.

THE

5 STEPS

TO YOUR PERFECT DOOR

Step 1

Decide on your door style. Twin glazed, single or solid, you can choose from our extensive ranges featured in the following pages.

Step 2

Select your glass. So many designs to select from, just refer to the pages relating to your door style for details.

Step 3

Choose a colour to suit your property or personal taste, there are great colours to choose from or you can request a bespoke colour.

Step 4

Choose a frame colour to suit your door. You can have it in white or matching the colour of your door.

Step 5

Finally no door is complete without the door furniture, we have a wide range of knockers, letterplates and handles to enhance your chosen door.

THE

SOVEREIGN

COLLECTION

Low Maintenance

No need to paint or varnish; simply wipe clean.

Secured by Design

All Sovereign doors are supplied with multi-point deadlock locking systems, which conform to Secured by Design. To upgrade to Secure by Design status, doors require laminated glass where applicable. Speak to your approved Sovereign Door installer.

Robust

Composite doors are durable, with no twisting, warping or splitting as with timber doors.

Thermally Efficient

All Sovereign Doors are 'B' Energy Rated (1.4 U-value) as standard.
Upgrade to triple glazing and achieve an 'A' Energy Rating (1.2 U-value).
All solid doors achieve an 'A++' Energy Rating (1.0 U-value).

OUR COMPLETE RANGE OF 44mm COMPOSITE DOORS
